

Year 7: Juggling Bag - Why do we study Design Textiles?

By studying Design and Technology we allow opportunities to develop skills and knowledge across a wide range of disciplines, using traditional, practical and computer aided tools. Design and Technology covers Product Design, Resistant Materials, Electronics, Fashion and Textiles and Engineering, all problem-solving subjects. Which build confidence and resilience in creative skills, testing, failing, improving and creating successful outcomes individually, or as part of a team.

This project will allow students to build on creative experiences had in primary school and skills from in and outside of school. This will allow students to build confidence and independence when manufacturing a textile product safely.
