## The Challenge:

Transferring from primary to secondary school is a major event in any student's life, but there are many things that schools can do to make this process a positive and stress-free experience.

The key to successful transition for all students is linked to their ability to develop good relationships with staff and their peers.

*There are five indicators of a successful transition system students:*

1. Develop new friendships and improve their self-esteem and confidence.
2. Settle in so well that they cause no concerns to their parents.
3. Show an increased interest in school and schoolwork.
4. Get used to their new routines and school organisation with ease.
5. Experience curriculum continuity and avoid any learning dip.
