4. Supported Pathway

4: Supported Pathway

Guided Option 1: Functional Skills English

This course is designed to develop written and verbal communication, and students can have the opportunity to gain additional qualifications such as Functional Skills English as part of this option. More generally, this option works in parallel with GCSE English and provides students with additional practice and literacy support. Students taking the Functional Skills option continue to work towards their GCSE English and English literature in their core English lessons. Students are assessed through an ongoing process for Functional Skills. It is delivered in a small group environment through the Inclusive Learning Department. There is opportunity for careers guidance as part of this course.

Making Informed Choices

The Options Booklet

Art and Design: Photography

In GCSE Photography you will learn about:

- how to use a DSLR and control depth of field and shutter speed to achieve creative results
- how to upload, store, share and print files
- using Affinity editing software to enhance and improve your original photos and achieve creative results through adding text or combining images
- how to research an idea, develop it and successfully complete a final piece
- being inspired by other artists and how to use them to drive forward your own learning
- where your strengths and interests lie in photography
- different types of lighting and how to use them to achieve creative results

You will learn by:

- completing a number of different projects for your 'Portfolio', each exploring a different genre (toys and games, movement photography and portraits) and using different photography techniques
- completing a practical mock exam in year 11. In this project you will respond independently to one of 7 given themes.
- practically exploring the cameras, working on location, learning techniques, developing skills and being experimental with how you take photos
- Using the computer to edit your photos to improve them, to add text to create graphic products and to use layers to create creative, innovative and unusual outcomes.
- discussing and reflecting on your work and progress individually and in groups
- annotating your work to explain, evaluate your progress and plan your next steps
- researching the work of other artists, discussing and writing analytical notes

You will be assessed by:

- Practical portfolio of coursework is worth 60% of your grade. This includes all classwork and homework from the start of year 10 through to January of year 11.
- A 4-month exam starting January in Year 11. This is a practical exam, responding to a theme set by the exam board. You have 4 months to prepare, plan and practise your practical work and then a final 10-hour practical exam (over 2 full days) to make your final piece. This 4-month body of work is 40% of your grade. *(It is worth noting that your exam is in April, concluding your course before your other exams begin.)*
- You are expected to include writing within your sketchbooks; however, your exam is not a written exam, it is purely practical.
